- The decrease in income was due to first implementation implication on SFAS 65 (IFRS 10) – on investment entity.

Increase in income tax

- Reversal on deferred tax, as a result on sale of investment asset

Increase in other comprehensive income

- Due to mark to market from AFS portfolio, majorly coming from Adaro shares.

Change to Financial Reporting Presentation

Starting from the first half of 2016, we began to apply “PSAK 65: Exemption on the Consolidation” in reporting our financial performance, which is aligned with the Company’s business model as an active investment company, provides more transparency to daily business activities and reflects the true value growth of the Company

As the change is applied prospectively, the Company’s 2016 financial reports is not comparable with its 2015 financial reports

<i>Key accounting changes</i>	Financial reports prior to 2016	Financial reports from 2016 onwards

Equity Risks and Mitigation Strategy

Potential risks

Movement in the share prices of the three major investee companies (ADRO, TBIG and MPMX) could impact Saratoga in the following manner

- 1 **Value of Saratoga's investment portfolio**
 - ADRO, TBIG and MPMX accounts for 78% of total portfolio value
 - 10% decline in ADRO (IDR175), TBIG (IDR545) and MPMX (IDR86) share price equates to a decline of 7.8% of portfolio value (IDR1.9 trillion)(*)
- 2 **Cash top-up on borrowings**
 - Cash top-up as collateral may be required if share prices decline
 - Cash top-up is triggered if ADRO's share price declines below IDR700 per share and TBIG's share price declines below IDR5,300 per share (assuming IDR/USD = 14,500)
- 3 **Saratoga's capability to source for funding**
 - When ADRO's and TBIG's share prices decline, Saratoga may face challenges in sourcing liquidity using shares as collateral for bank loans, exchangeable bonds, or for placement / divestment

Mitigation strategy

To mitigate and minimize equity risk, Saratoga continues to diversify its investment portfolio, while maintaining a minimum cash balance

Combination of ADRO, TBIG and MPMX as collaterals

- Provides diversification given the following correlations for the past 500 days
- TBIG vs ADRO (-0.41), TBIG vs MPMX (-0.05) and ADRO vs MPMX (+0.84)

Short term liquidity as buffer

- Minimum cash balance and short term facility to cover cash top-up in the event that share prices decline

Unpledged equity shares in investee companies

- Majority of Saratoga's equity shares in the three major investee companies remain unpledged as of 31 December 2016
- ADRO (59% of Saratoga's equity shares unpledged), TBIG (51%), MPM (71%)

(*) Based on share prices as of 31 March 2017
